

NIKEN OKTAVIA

BUSINESS ANALYST | SAP, FMS & ENTERPRISE INTEGRATION

+62-813-7894-2304 | nikenoktavia2000@gmail.com | linkedin.com/in/niken.oktavia | 20262020.github.io/niken.oktavia.github.io

PROFESSIONAL SUMMARY

Business Analyst with over 3.5 years of experience in business process analysis, supply chain operations, system enhancement, and enterprise integration. Experienced in supporting SAP, Facility Management System, Farmer Operations Management System, MuleSoft, API, and WB.NET initiatives. Skilled in requirement gathering, CRF and functional documentation, process flow design, field mapping, SIT, UAT, dashboard reporting, and stakeholder coordination. Proven ability to translate business needs into practical system solutions that improve operational efficiency and user experience.

PROFESSIONAL EXPERIENCE

Middle Office Assistant Analyst (Business Process Analyst) | Wilmar Dec 2022 - Present Consultancy Service, Indonesia

- Conduct business process analysis and requirement gathering to identify operational inefficiencies and translate business needs into functional system solutions.
- Prepare change request forms, functional requirements, process flows, business rules, user scenarios, field mappings, and supporting documentation for system enhancements.
- Support the implementation and enhancement of the Farmer Operations Management System, including farmer ordering processes, operational control, and data accuracy improvements.
- Support Facility Management System enhancements covering access management, permit management, approval workflows, document generation, and operational processes.
- Review integration requirements across internal applications, SAP, MuleSoft, API services, and WB.NET, including JSON payloads, field mappings, system responses, and error investigation.
- Coordinate SIT and UAT activities, document test results, investigate issues, and verify that solutions meet business requirements before deployment.
- Contribute to mobile UI/UX revamp activities by reviewing user flows, screen layouts, usability requirements, and alignment with business processes.
- Develop management dashboards and actionable reports, and coordinate with business users, developers, integration teams, and stakeholders throughout delivery.
- Prepare training materials and support end users to facilitate smooth system adoption.

Intern - Production Planning & Inventory Control (PPIC) and Warehouse | 2021 - 2022 Wilmar Nabati Indonesia

- Analyzed raw material requirements for weekly production planning and supported more efficient inventory control.
- Developed faster raw material planning approaches to reduce waste and improve production scheduling.
- Designed warehouse layout improvements that reduced material retrieval time by approximately 30%.
- Monitored and controlled daily material flows to optimize usage and reduce excess inventory.
- Contributed to inventory tracking improvements that supported production planning accuracy.

KEY ACHIEVEMENTS

- Improved warehouse layout, reducing material retrieval time by approximately 30%.
- Contributed to a successful system integration initiative that increased cross-functional collaboration and operational productivity.
- Contributed to supply chain process improvements associated with a 20% increase in operational efficiency and a 15% cost reduction.

SELECTED PROJECTS

Farmer Operations Management System

Supported requirement analysis, business process documentation, system enhancement, SIT, UAT, and stakeholder coordination for farmer operational and ordering processes.

Facility Management System

Supported workflow and process enhancements covering access management, permit management, approval matrices, document generation, and operational reporting.

SAP and WB.NET Integration

Reviewed integration requirements, field mapping, JSON payloads, API responses, and system errors across internal applications, MuleSoft, SAP, and WB.NET.

Mobile UI/UX Revamp

Reviewed mobile user flows, screen layouts, usability requirements, and alignment between interface design and operational business processes.

CORE SKILLS

Business Analysis

Requirement Gathering; Business Process Analysis; As-Is and To-Be Design; CRF; Functional Documentation; Business Rules; User Scenarios

Testing & Delivery

SIT; UAT; Test Scenarios; Issue Analysis; Troubleshooting; User Training; Agile Collaboration

Systems & Integration

SAP; FMS; Farmer Operations Management System; MuleSoft; API; WB.NET; JSON; Field Mapping

Data & Design

Dashboard Reporting; Data-Driven Decision Making; Mobile UI/UX Review; Microsoft Excel; Process Flow Documentation

EDUCATION

Diploma III in Agro Logistics Management | Politeknik ATI Padang | 2019 - 2022

GPA: 3.31/4.00

CERTIFICATIONS

- Internship Certificate - Production Planning & Inventory Control, Wilmar Nabati Indonesia (2022)
- Competency Certificate - Industrial Agro Logistics Management in Warehousing Operations (2022)
- TOEFL Certificate

LANGUAGES

Bahasa Indonesia - Fluent

English - Intermediate (TOEFL Certified)
