

NIKEN OKTAVIA

BUSINESS ANALYST | BUSINESS PROCESS | SYSTEM ENHANCEMENT | INTEGRATION SUPPORT

+62 813-7894-2304 | nikenoktavia2000@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Business Analyst with 3+ years of experience in business process analysis, system enhancement, application testing, and enterprise integration support. Experienced in translating operational needs into clear functional requirements, CRF and FDS documentation, As-Is and To-Be flows, validation rules, field mapping, SIT, and UAT. Hands-on exposure to FMS, FOMS, SAP, WB.NET, MuleSoft, APIs, JSON payloads, dashboards, and mobile UI/UX review, with strong coordination across business users, developers, testers, SAP teams, and multinational stakeholders.

PROFESSIONAL EXPERIENCE

Middle Office Associate Analyst (Business Process Analyst)

Dec 2022 - Present

| Wilmar Consultancy Service, Indonesia

- Analyze business processes and gather requirements to identify operational gaps and translate business needs into functional system solutions.
- Prepare CRF, FDS, business rules, validation logic, field mapping, process flows, user scenarios, meeting minutes, and implementation support documents.
- Support FMS enhancements covering access management, permit management, approval workflows, service transactions, document generation, reporting, and operational control.
- Support FOMS enhancements for farmer operations and ordering processes, including requirement clarification, data validation, testing, and user issue investigation.
- Review integration requirements across internal applications, SAP, MuleSoft, APIs, and WB.NET, including JSON payloads, field mapping, system responses, and error analysis.
- Prepare and execute SIT scenarios, support UAT, document results, coordinate defect resolution, and verify that delivered changes meet approved requirements.
- Review mobile user journeys, screen layouts, field behavior, mandatory rules, validation messages, and UI/UX improvements based on operational needs.
- Develop dashboards and actionable reports, prepare training materials, and support end users during implementation and adoption.

Intern - Production Planning & Inventory Control (PPIC)

2021 - 2022

and Warehouse | Wilmar Nabati Indonesia

- Analyzed raw-material requirements for weekly production planning and supported inventory control and material availability.
- Developed faster planning approaches to reduce waste and improve production scheduling.
- Redesigned warehouse layout and material placement, reducing retrieval time by approximately 30%.
- Monitored daily material flows and supported inventory tracking improvements for production planning accuracy.

SELECTED ACHIEVEMENTS

- Reduced warehouse material retrieval time by approximately 30% through layout and placement improvements.
- Contributed to cross-functional system integration initiatives that improved coordination between business and technical teams.
- Supported supply-chain process improvements associated with approximately 20% higher operational efficiency and 15% cost reduction.

SELECTED PROJECTS

Farmer Operations Management System (FOMS)

Supported requirement analysis, process documentation, system enhancement, SIT, UAT, issue investigation, and stakeholder coordination for farmer operational and ordering processes.

Facility Management System (FMS)

Supported enhancements involving access management, permit management, service transactions, approval matrices, validation rules, document generation, operational reporting, and user testing.

SAP and WB.NET Integration Support

Reviewed integration requirements, source-to-target field mapping, JSON payloads, API responses, SAP feedback, and system errors across internal applications, MuleSoft, SAP, and WB.NET.

Mobile Application UI/UX Revamp

Reviewed mobile user journeys, screen layouts, field visibility, mandatory rules, validation messages, and usability improvements to align the interface with business processes.

CORE SKILLS

Business Analysis

Requirement Gathering; Business Process Analysis; Gap Analysis; As-Is and To-Be; Business Rules; Validation Logic; Stakeholder Coordination

Functional Documentation

CRF; FDS; Process Flows; User Scenarios; Field Mapping; Meeting Minutes; Training Materials

Systems and Integration

SAP; FMS; FOMS; WB.NET; MuleSoft; API; JSON; Payload and Response Review

Testing and User Experience

SIT; UAT Support; Defect Analysis; Troubleshooting; Validation Testing; Mobile UI/UX Review

EDUCATION

Diploma III in Agro Logistics Management | Politeknik ATI Padang | 2019 - 2022

GPA: 3.31 / 4.00

CERTIFICATIONS

- Competency Certificate - Industrial Agro Logistics Management in Warehousing Operations (2022)
- Internship Certificate - Production Planning & Inventory Control, Wilmar Nabati Indonesia (2022)
- TOEFL Certificate

LANGUAGES

Bahasa Indonesia - Fluent

English - Intermediate (TOEFL Certified)
